

S03-L07 Using two indexes

```
SELECT
    employee.id,
    employee.personal_code
FROM employee
WHERE (
    employee.personal_code = '7C-91159'
    OR
    id BETWEEN 12340 AND 12400
)
;
```

EXPLAIN SELECT shows that the engine chose **UNION** .
