How to write a beautiful query?

S02-L02 How to write a beautiful query?

Simple rules to start with:

- Use inline comments
- Use tabs instead of spaces
- Indent all sub-queries
- Use "`AND 1=1`"
- Split column names to new lines
- Add empty lines for complex queries
- Do not shorten table name aliases
- use the backtick (`) before and after table & column names

Note: Detailed code examples are in the attached .md / PDF file.
