MySQL 5.7 Reference Manual / SQL Statement Syntax / MySQL Compound-Statement Syntax / Cursors / Cursor CLOSE Syntax

14.6.6.1 Cursor CLOSE Syntax

```
CLOSE cursor_name
```

This statement closes a previously opened cursor. For an example, see Section 14.6.6, "Cursors".

An error occurs if the cursor is not open.

If not closed explicitly, a cursor is closed at the end of the BEGIN ... END block in which it was declared.
